Quizzes Save time and prevent data loss with the Restore Deleted Quizzes functionality | New

This feature adds a new option in quizzes that allows instructors to restore deleted quizzes. This option appears in the **More Actions** menu in the Quizzes tool. Instructors using this option are provided with a list of deleted quizzes that indicates when they were deleted and by whom, along with a button to restore a selected quiz.

Restored quizzes automatically have any associated quiz attempts that were already taken, statistics, and scores for those quiz attempts restored as well. Learning Outcomes associated to quiz questions are unaffected, and re-appear with the questions when the quiz is restored. Links to a grade item and competencies are not restored.

The **Delete Quizzes** permission has been renamed to **Delete and Restore Quizzes**. Roles that previously had the **Delete Quizzes** permission set automatically gain the ability to restore quizzes.

This feature implements the following PIE items:

- D2807 (Restore Deleted Quizzes)

Figure: The **Restore** option in the **More Actions** drop-down menu of the **Manage Quizzes** tab.
